

Presentation by Ghana Federation of Disability Organizations

Leave No One Behind

We call on the government to ensure that policies, strategies and programmes promote inclusion and increased equality across the nation, by putting 'leave no one behind' at the centre of its work. Ensure that disability and gender is mainstreamed across all the goals. Provide practical tools, guidance and resources on 'leave no one behind' and disability-sensitivity to all government agencies and implementing partners. Implement existing inclusion strategies and approaches and ratify the African Disability Protocol to cater for contextual issues of disabilities in Africa.

We further call on the government to engage, collaborate with and support civil society and other organisations representing left behind groups to ensure an even more inclusive development in the country. Ensure that disability is treated as a across-cutting issue in the nation's development agenda and realise commitments made in the Data Disaggregation Action Plan and Inclusive Data Charter.

Thank you
